Rubber Compounds

REKOR KAÜÇÜK

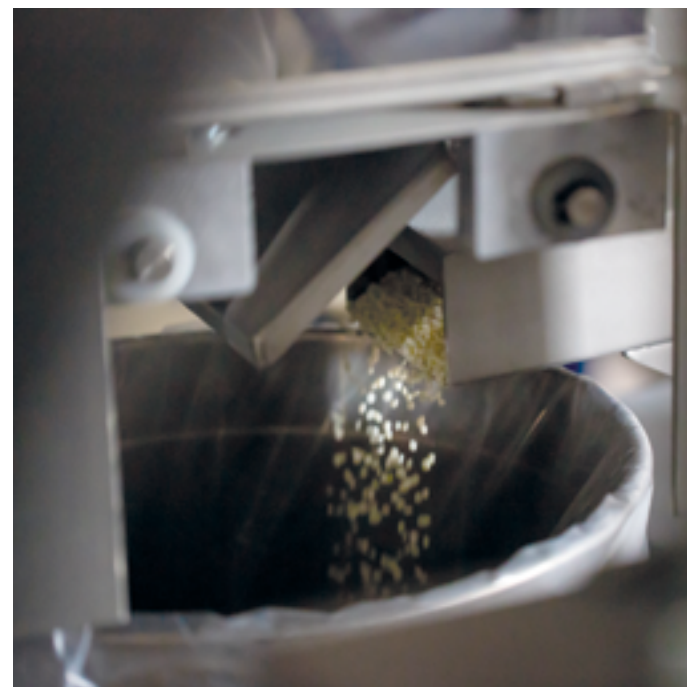

- **Turkey's Fortune 1000 company**

with a proven **75 years history** producing high quality custom made technical rubber compounds

- **Technical black and colored rubber compounding** for the automotive, airspring, industrial hose, home appliance, insulation, shoe industries & OEMs
- Custom **cord-fabric reinforced rubber products** for airspring, tyre & industrial hose sectors.
- Hot & precured tread and retreading materials for **tyre retreading industry**.

MIXING GROUP

From formulation to final compound

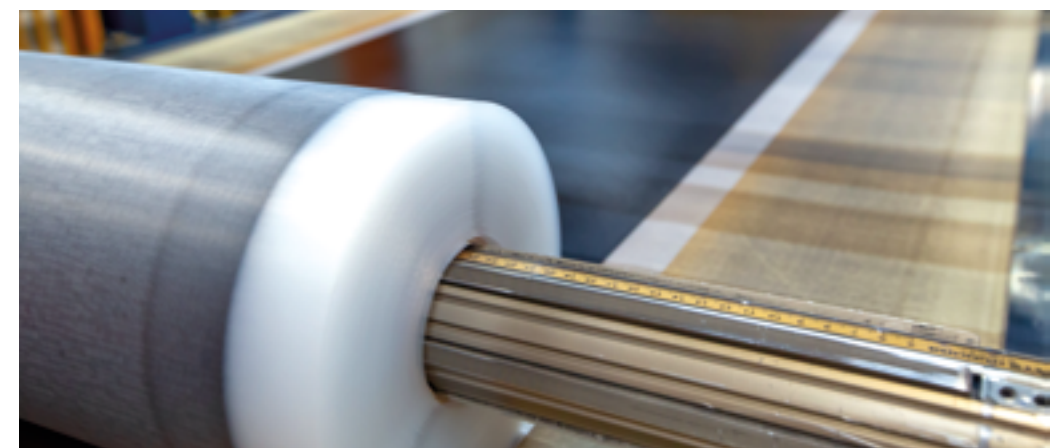

- **3 Fully automated** chemical formulation units
- **6 mixing lines**, including HF intermesh mixers
- 1 dedicated colored line
- **60,000 tons** annual capacity
- Full traceability

EXTRUSION & CALENDERING GROUP

- 1 Extruder & 3 Gum calenders with thickness precision **as thin as 0.4mm**

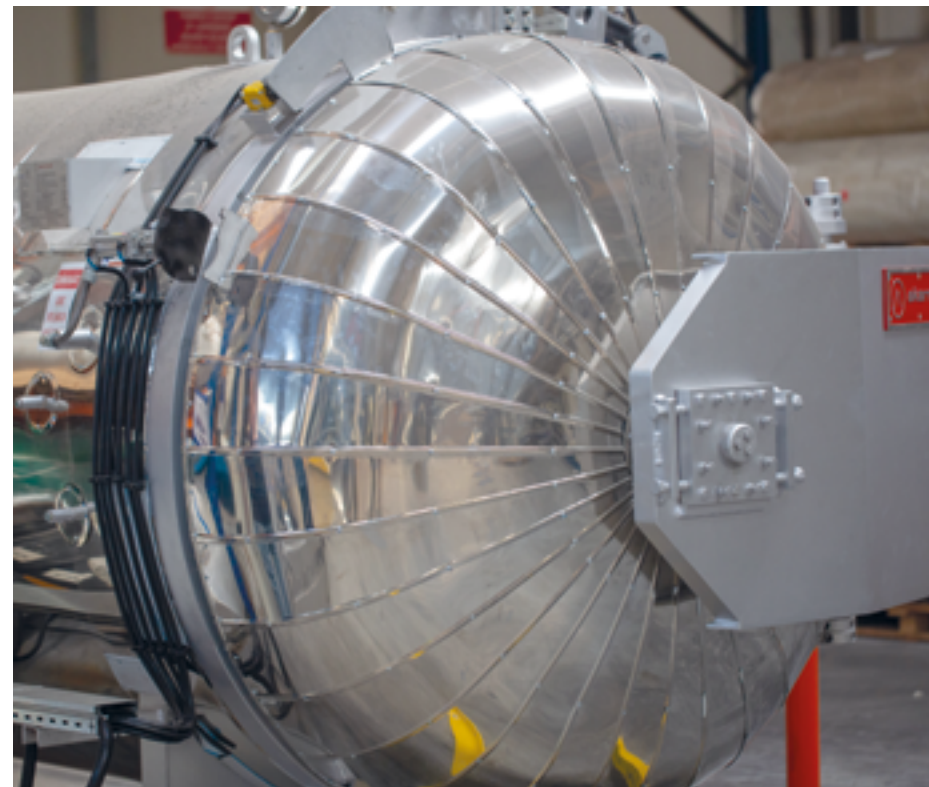

STRAINING

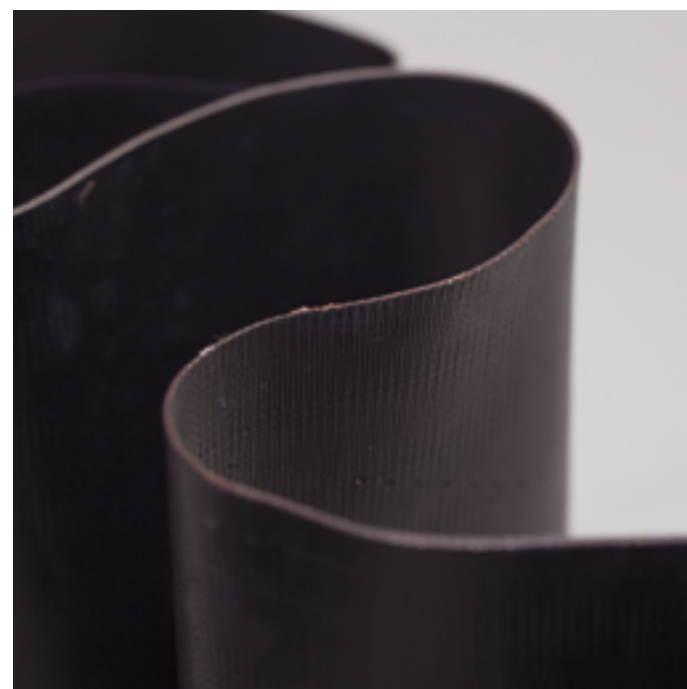

- Rekor uses state of the art Gear Pump technology to strain rubber compounds upon request of customers. This technology allows fine mesh straining of rubber compounds especially for those high quality clean rubber applications.

AUTOCLAVE

- In addition to advanced mixing technologies, Rekor can also vulcanize calendered rubber sheets in rolls according to the requirement of different rubber industries.

CORD FABRIC CALENDERING

- High Technology 4 Roll Cord Fabric Calender
- Computerised Process
- Thickness Precision between **0,5 MM – 3 MM**
- Supplier to Air Springs, Tyre, Industrial Hose Sectors

RETREAD PRODUCTIONS

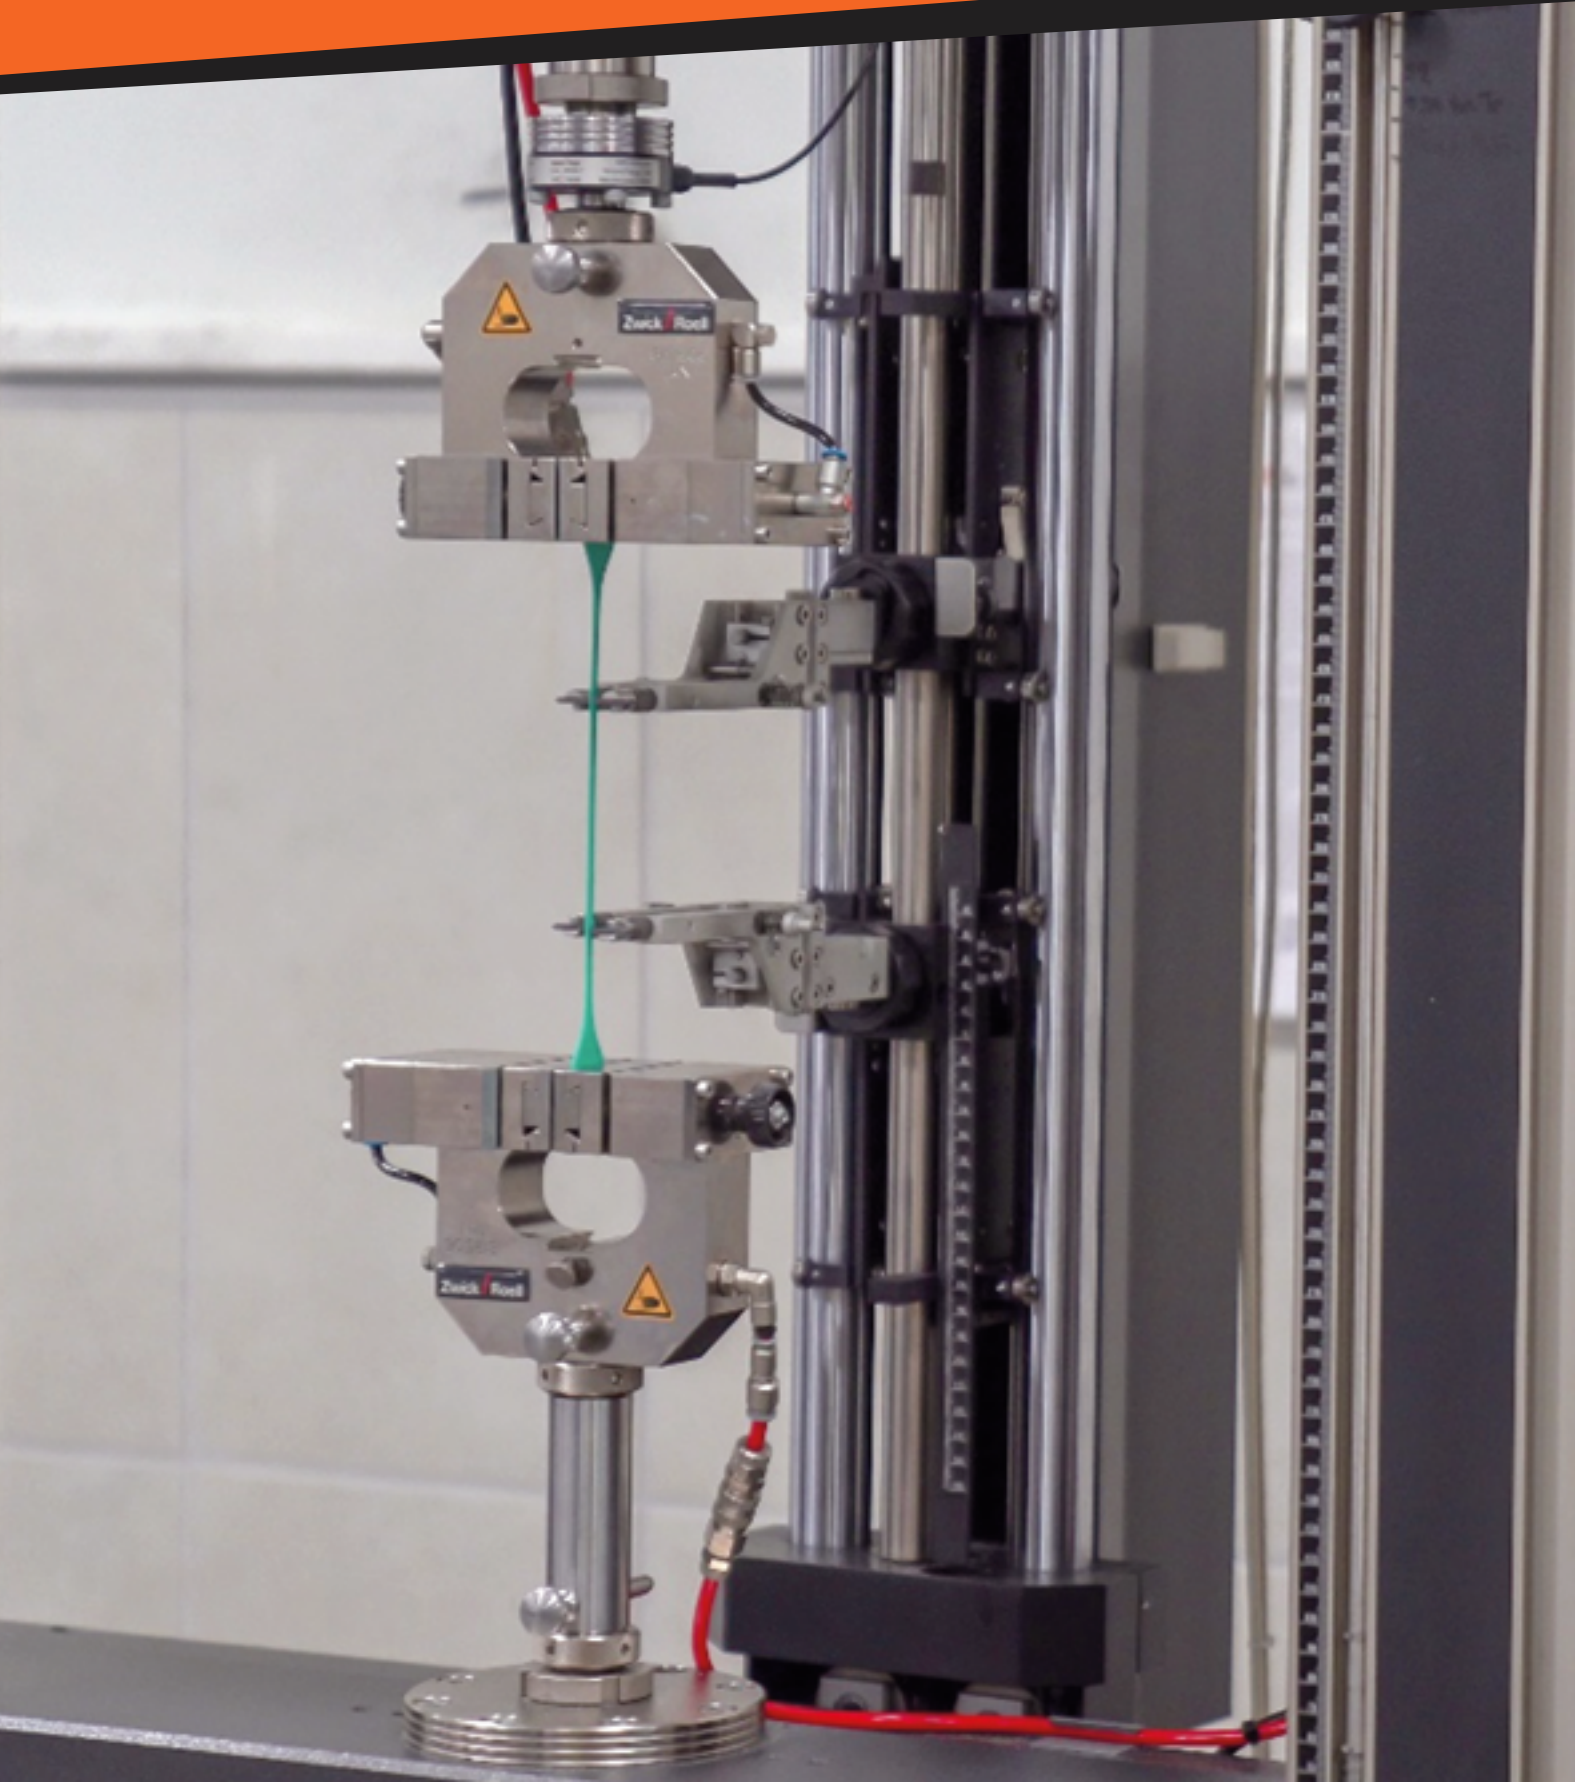

- **2 x 11 Mt** PCT Presses
- **1 x OTR** Tyre Retreading Press
- **Hot & pre-cure** retread productions
- Supplier to **retreaders globally**

QUALITY & COMPLIANCE

R&D

- Focus on Research & Product Development is the foundation to Rekor's position as a leader in custom rubber compounding
- With our dedicated team of R&D engineers, we partner with our customers' scientists and consider their processes, technical specifications, cost effectiveness, as well as the latest in raw materials to develop solutions.

- **High Technology Test Facilities**
- **High-end Lab Capabilities**
- **Custom Made Recipes**
- **Lab-size Sample Production**

SUPPLY CHAIN MANAGEMENT

- Consistent & Secure Supply of Quality Raw Materials

- Logistics & Warehousing

- Inventory Management

Over 800 Raw Materials From Around the World Turn Into
Millions of Rubber Products For The World

WHY OUTSOURCE YOUR RUBBER COMPOUNDING?

Leading OEMs and manufacturers of rubber products take advantage of outsourcing services for compounding and formulation development.

STRATEGIC	Allocate your resources on your core business, outsource all possible and unforeseen risks.
OPERATIONAL	Improved production flexibility and capacity, controlled labor costs, reliable and cost-controlled raw materials, access to high-end R&D and lab, be safe with a 24/7 quality assurance.
FINANCIAL	Eliminate capital investments for compounding equipment, save working capital by not buying/stocking raw materials until needed, reduce inventory and maintenance costs, and lower your fixed costs by partnering with REKOR.
